The band Comfort Zone is a vibrant 7 piece band from Cape Town, South Africa and has been established in 2006.

As a team we always had a definite and precise attitude to our career right from its inception, having survived both the feverishness and fluctuations of the music industry locally and abroad.

Flexibility has become the key of the band and each individual in their own right has done various gigs, contracts, tours, recordings and stage productions across the globe and that's how Comfort Zone was founded.

As Comfort Zone we believe in team work and do everything to the best of our ability to ensure that what we do on stage always Heal, Encourage and Motivate!
